

Lot # XXXXX

MATERIAL DATA SHEET

MINDY-2/FAM63B, *human recombinant*

Cat. # E-620

MINDY-2/FAM63B is a member of a newly characterized cysteine protease family of deubiquitinases ("DUBs"). In humans, the MINDY (MIU containing novel DUB family) family has four members, with the additional three being MINDY-1/FAM63A, MINDY-3/FAM188A and MINDY-4/FAM188B. The catalytic domain of MINDY DUBs adopts a conformation that is distinct from other known DUB classes, and these enzymes are highly selective at cleaving K48-linked polyubiquitin chains. With a predicted molecular weight of 67 kDa, human MINDY-2 is 82% identical to both its murine and rat orthologs. This recombinant protein is untagged.

Product Information

Quantity:	50 µg
Stock:	X mg/ml (X µM) in 50 mM HEPES pH 7.5, 100 mM NaCl, 10% (v/v) Glycerol, 1 mM TCEP
MW:	67 kDa May run at a higher apparent MW on reducing SDS-PAGE gel
Source:	E. coli
Purity:	> 95% by SDS-PAGE under reducing conditions and visualized by Colloidal Coomassie Blue stain

Use & Storage

Use:	Recombinant Human MINDY-2 is a Ubiquitin-specific deconjugating enzyme that cleaves K48-linked polyubiquitin chains.
Storage:	Store at -80°C. Avoid multiple freeze/thaw cycles.
