

MATERIAL DATA SHEET**SUMO2 Agarose, *human recombinant*****Cat. # UL-755**

SUMO2 covalently coupled to agarose beads via primary amines allowing for a fully functional C-terminus. Useful for isolation and capture of SUMO2 interacting proteins such as the SUMO activating E1 enzyme, the SUMO carrier enzyme Ubch9, SUMO E3 ligases, SENPs and other proteins/enzymes that have an affinity for SUMO proteins.

Product Information

Quantity:	0.5 ml
Stock:	0.5 ml SUMO2 agarose is supplied in a 1 ml total volume of 50 mM Hepes pH 7.5, 250 mM NaCl, 1mM NaN ₃ .

Use & Storage

Use:	Equilibrate resin by washing with 5-10 ml desired start buffer. Binding and elution of material is dependent on individual experimental conditions.
Storage:	The agarose can be re-used for at least 5-10 applications if properly maintained. After use, clean resin with 5ml 50 mM Tris pH 9.0, 1 M KCl. Remove cleaning solution by washing resin with 5 ml storage buffer. Resin should be stored at 4°C and 0.01% sodium azide can be added as a bacteriostatic agent. DO NOT FREEZE.
