

**MATERIAL DATA SHEET****HA-SUMO3 Vinyl Sulfone, *human recombinant***  
**Cat. # UL-769**

This N-terminal HA-tagged SUMO is a potent, irreversible and specific inhibitor of SUMO-specific proteases (SENPs). This protein inhibits the hydrolysis of poly-SUMO chains on substrate proteins *in vitro* and thus enhances poly-SUMO chain accumulation. The HA peptide sequence (YPYDVPDYA) is derived from the influenza hemagglutinin protein. This epitope allows for the sensitive identification or purification of SENP activities since it is specifically recognized by anti-HA antibodies and/or anti-HA-agarose.

**Product Information**

<b>Quantity:</b>	25 µg
<b>Stock:</b>	X mg/ml (XµM) in 50 mM Hepes pH 7.0, 150 mM NaCl, 10 % glycerol. Concentration varies with Lot #.
<b>MW:</b>	10.5 kD
<b>Purity:</b>	> 90%

**Use & Storage**

<b>Use:</b>	Add directly to <i>in vitro</i> assay from the stock solution. Depending on conditions, typical concentrations to fully inhibit SENPs <i>in vitro</i> are 1-5 µM.
<b>Storage:</b>	Store stock solution at -80°C. Avoid multiple freeze/thaw cycles.
